

[Advanced Threat Analytics \(ATA\) Version 1.6 \(x64\) - DVD Free Download](#)

A screenshot of a web-based security code verification interface. At the top, there are several small icons. The main heading asks "How do you want to receive your security code?". Below this, there are two radio button options. The first option, "Text \*\*\*\*\*66", is selected. Below it, there is a paragraph of instructions: "To verify that this is your phone number, enter the last 4 digits including 66, and then click 'Send code' to receive your code." This is followed by a text input field labeled "Last 4 digits of phone number". The second option is "I can't verify my account". Below the options is a grey "Send code" button. At the bottom, there is a link "I have a code" and footer text including "Terms of Use", "Privacy & Cookies", "Sign out", and "© 2016 Microsoft".
