[Komodia SSL Certificates And Hijacking Tech Are Widely Spread](#)

The screenshot shows the IBM WebSphere Administration Console interface. The browser address bar displays the URL: `https://maxsup227.swg.usma.ibm.com:9043/bm/console/login.do?actions=secure`. The console title is "WebSphere - Admin". The left-hand navigation pane shows a tree structure with categories like "Home", "Services", "Time Operations", "Security", "Operational policies", "Environment", "System administration", "Users and Groups", "Monitoring and Tuning", "Troubleshooting", and "Service integration". The main content area is titled "SSL certificate and key management" and shows a configuration page for "SSL configurations > New...". The page description is "Defines a list of Secure Sockets Layer (SSL) configurations." The configuration form includes the following fields:

- Name:** ODHSSLCD0P18
- Trust store name:** CellDefaultKeyStore ((cell)ctgCell01)
- Keystore name:** NodeDefaultTrustStore ((cell)ctgCell01:(node)ctgNode01)
- Default server certificate alias:** (none)
- Default client certificate alias:** (none)
- Management scope:** ((cell)ctgCell01:(node)ctgNode01)

Buttons at the bottom of the form are "Apply", "OK", "Reset", and "Cancel". On the right side, there is a "Help" section with "Field help" and "Page help" links.

## [Komodia SSL Certificates And Hijacking Tech Are Widely Spread](#)
