

Project Information for the Amoebae Inventory Project

Project Details

Principal Investigator: Gerry Middleton

Project Description: The survey of Amoeboid organisms.

Project Dates: **Start Date:** 1/1/2006 **End Date:**

Protocol: We collected various substrates in the field that are known testate amoeba habitat, i.e., creek sediment, wetland sediment, mosses, etc. The typical sample weight was <25 grams for sediments and <10 grams for mosses.

Project Notes:

Summary:

Data Summary

Data Collection Year(s): 2006 to 2007

Number of Sites Sampled:	24
Number of Samplings:	27
Number of Orders Identified:	3
Number of Families Identified:	16
Number of Species Identified:	26
Number of Specimens Identified to Species:	203
Number of Specimens not Identified to Species:	55
Total Number of Individuals Counted (actual or estimated):	258
Number of Genera Identified:	19
Percentage of Major Watersheds Sampled:	13 %
