

Project Information for the ATBI Centipedes Project

Project Details

Principal Investigator: Joseph DeSisto

Project Description: General ATBI sampling where centipedes were collected.

Project Dates: Start Date: 7/1/2014 End Date:

Protocol: Sampling is by various methods determined by each collector, often on an ad hoc basis.

Project Notes: This project was first established in 2014 to contain data generated by centipede specimens identifications (historic collections and current collections) by student taxonomist, Joseph DeSisto.

Summary: The All Taxa Biodiversity Inventory of Great Smoky Mountains National Park. Many sources contribute to this large effort. This general category is for data not associated with any specific project, but where centipedes were collected or observed.

Data Summary

Data Collection Year(s): 1999 to 2014

Number of Sites Sampled:	33
Number of Samplings:	41
Number of Orders Identified:	3
Number of Families Identified:	8
Number of Species Identified:	34
Number of Specimens Identified to Species:	120
Number of Specimens not Identified to Species:	0
Total Number of Individuals Counted (actual or estimated):	287
Number of Genera Identified:	16
Percentage of Major Watersheds Sampled:	28 %
