

**PROJECT: ATBI Plant Viruses**  
**Virus Species Site Count for 2006 - 2007**

<b>Family</b>	<b>Genus</b>	<b>Epithet</b> (Common Name)	<b>Site Count</b>
<b>Caulimoviridae</b>			
	Petuvirus	Rhododendron virus N	4
<b>Flexiviridae</b>			
	Capillovirus	Apple stem grooving virus	2
	Foveavirus	Apple stem pitting virus	4
		Rubus virus R	2
	Potexvirus	Clover yellow mosaic virus	1
		White clover mosaic virus	2
<b>Luteoviridae</b>			
	Enamovirus	Summer grape virus 2	1
	Luteovirus	White snakeroot mosaic virus 2	3
<b>Partitiviridae</b>			
	Alphacryptovirus	Viburnum cryptic virus 1	1
	Partitiviridae_genus	Rhododendron virus A	1
		Rhododendron virus B	2
		STV-like virus	1
<b>Picomavirales_family</b>			
	Sadwavirus		

(Where "Species" appears, it means that this has not yet been identified.)

<b>Family</b>	<b>Genus</b>	<b>Epithet</b> (Common Name)	<b>Site Count</b>
<b>Reoviridae</b>		Black raspberry necrosis virus	1
	Oryzavirus		
<b>Totiviridae</b>		Summer grape virus 1	1
	Totiviridae_genus		
<b>Tymoviridae</b>		ScV-L-BC like virus	1
	Marafivirus		
<b>Virus_family</b>		Blackberry virus S	4
	Umbravirus		
		White snakeroot mosaic virus 1	3
	Virus_genus		
		Curvularia thermal tolerance-like virus	1

(Where "Species" appears, it means that this has not yet been identified.)
