

**PROJECT: ATBI Bear Bacteria**  
**All Species Site Count for Historic Sites**

Family	Genus	Epithet + Subspecies	(Common Name)	Site Count
<b>Staphylococcaceae</b>				
	<b>Staphylococcus</b>			
		aureus (Staph bacterium)		1
		gallinarum (Staph bacterium)		1
		intermedius (Staph bacterium)		1
		kloosii (Staph bacterium)		1
		lutrae (Staph bacterium)		1
		muscae (Staph bacterium)		1
		pasteuri (Staph bacterium)		1
		pasteuri strain LF-2 (Staph bacterium)		1
		pseudintermedius (Staph bacterium)		1
		saprophyticus (Staph bacterium)		1
		saprophyticus Saprophyticus (Staph bacterium)		1
		Schleiferi (Staph bacterium)		1
		Schleiferi Coagulans (Staph bacterium)		1
		Schleiferi Coagulans, strain GA 211 (Staph bacterium)		1
		sciuri (Staph bacterium)		1
		species (Staph bacterium)		1
<b>Ursidae</b>				
	<b>Ursus</b>			
		americanus (Black bear)		1

(Where "Species" appears, it means that this has not yet been identified.)
